

## Air Compressor Whisper Blue Synthetic Oil

- SMART OIL™ Whisper Blue Synthetic is a revolutionary new product in the advanced oil technology category with 4 U.S. Patents.
- Smart Oil™ bonds with all internal metal surfaces in air compressor pumps and air-cooled & water-cooled engines to become a part of the product itself. This process creates a quieter, more efficient, and higher performance compressor pump or engine - in many cases up to 50% quieter.
- By reducing friction, on all moving parts of the compressor pump and/or air-cooled engines, Smart Oil™ saves up to 15% in energy or fuel savings.
- Using SMART OIL™ in any air-cooled or water-cooled engine will ensure up to 2X the normal engine life and extend the engine warranty.
- SMART OIL™ also improves horsepower performance by up to 10%.
- SMART OIL™ works with all brands of air compressors and all products using air-cooled or water-cooled engines.
