

Honda Power Equipment sets a new standard in portable power with the introduction of an all-new EU2200i inverter generator. Part of Honda Power Equipment’s Super Quiet Series of generators, the new EU2200i lineup is the perfect portable generator for work, home or play.

The all-new Honda EU2200i inverter generator offers tremendous value to users, delivering 10 percent more power (200 watts) than the outgoing EU2000i model, the company’s most popular portable model for the same price. The heart of the additional power the new generator delivers is the Honda GXR120 engine. With more power, better performance and improved ease of use and maintenance, the all-new Honda EU2200i is the perfect choice for consumers to power what they need for work, home or play.

In addition to more wattage, the all-new EU2200i delivers consumers additional user-friendly features including a fuel shut off valve that allows the engine to run with the fuel supply off, helping prevent issues related to stale fuel; a large spout and oil drain gutter for cleaner, easier oil changes; a smooth, light effort recoil; a user-friendly design that incorporates color-coded startup points to start the generator; and increased ventilation that improves airflow resulting in better cooling of key components.
