

Emergency Contact Information:

Quincy Compressor 701 North Dobson Avenue

217.222.7700

Bay Minette, AL 36507

Prepared according to 29CFR 1910.1200.

Chemical Product Identification

QUIN-CIP®-D Product Trade Name

CAS Number None.

Synonyms

Generic Chemical

Name

Product Type Preparation/Revision

Date

Not applicable for mixtures.

Mixture.

Multipurpose.

August 2012

2 Hazards Identification

Appearance Clear to yellow liquid.

Odor Mild Principal Hazards Danger.

- Causes severe eye irritation risk of irreversible eye damage.
- Harmful if swallowed.
- Harmful if inhaled.
- Harmful if absorbed through skin.
- May cause skin irritation.
- May cause respiratory tract irritation.
- May cause allergic skin reaction.
- May cause chronic health effects.

Target Organs: Blood Central nervous system Kidney Liver Peripheral nervous system Hematopoietic system *See Section 11 for complete health hazard information.

- 4		
	2	Composition/Information on Ingredients
	3	Composition/information on ingregients
	~	

Hazardous Ingredients

Comp	CAS No.	Percentage (by wt.)	Carcinogen
Aniline	62-53-3	17.3%	N/E
Tricresyl phosphate	1330-78-5	From 1 to 4.9 percent	N/E

(N/E) - None established

4	First Aid Measures		
Eyes Rinse with water for several minutes. Remove contact lenses, if present and easy to Continue rinsing. Immediately call a poison center or doctor.			
Skin	Wash with plenty of soap and water. Immediately remove contaminated clothing. Call a	Was	

poison center or doctor if you feel unwell. Launder contaminated clothing before reuse.

Inhalation Remove victim to fresh air and keep in a rest position comfortable for breathing. Call a

poison center or doctor.

Oral DO NOT INDUCE VOMITING. Rinse mouth. Get immediate medical attention.

Page | 1 MSDS #115468

5 Fire Fighting Measures

Flash Point 260 °C, 500 °F ASTM D 92 (Typical)

Extinguishing Media CO2, dry chemical, or foam. Water can be used to cool and protect exposed material. Water

can be used to cool and protect exposed material.

Firefighting Procedures Wear full protective fire gear including self-containing breathing apparatus operated in the positive pressure mode with full face piece, coat, pants, gloves and boots. Use water to cool

containers exposed to fire.

Unusual Fire & Explosion Hazards

Closed containers may explode on heating. See section 10 for additional information.

6 Accidental Release Measures

Spill Procedures Personal Protective Equipment must be worn, see Personal Protection Section for PPE

recommendations. Take precautions to avoid release to the environment. Ventilate area if spilled in confined space or other poorly ventilated areas. Prevent entry into sewers and waterways, dispose of in accordance with all federal, state and local environmental regulation. Pick up free liquid for recycle and/or disposal. Residual liquid can be absorbed

on inert material.

7 Handling and Storage

Pumping Temperature Not determined.

Maximum Handling Temperature

Not determined.

Handling Procedures

Keep containers closed when not in use. Do not discharge into drains or the environment; dispose in an authorized waste collection point. Use appropriate containment to avoid environmental contamination. Do not breathe dust, fume, gas, mist, vapors or spray. Use only outdoors or in a well-ventilated area. Wash thoroughly after handling. Contaminated work clothing should not be allowed out of the workplace. Launder contaminated clothing before reuse. Empty container contains product residue which may exhibit hazards of product. Do not eat, drink or smoke when using this product. Dispose of packaging or containers in accordance with local, regional, national and international regulations.

Maximum Storage Temperature

Not determined.

Storage Procedures

Take precautions to avoid release to the environment. Store in dry, well ventilated place away from sources of heat and direct sunlight. Store locked up. See section 10 for

incompatible materials.

Maximum Loading Temperature

Not determined.

8 Exposure Controls/Personal Protection

Exposure Limits

			Exposure Guidelines				
	OSHA		ACGIH		Other		
Comp	TWA	STEL	TWA	STEL	TWA	STEL	
Aniline	5 ppm (s)	N/E	2 ppm (s)	N/E	N/E	N/E	

(s) - Skin exposure

(p) - Proposed limit

(c) - Ceiling exposure

(I) - Recommended exposure limit

(u) - Supplier recommended exposure limit

Quincy Compressor 701 N. Dobson Ave Bay Minette, AL 36507 1-217-222-7700

Page | 2 MSDS #115468

(N/E) - None established

Other Exposure Limits Contains synthetic basestock. Under conditions which may generate mists, observe the

OSHA PEL of 5 mg per cubic meter, ACGIH TWA of 5 mg per cubic meter for mineral oil

mists.

Engineering Controls Use local exhaust ventilation to control mists or vapors. Additional ventilation or exhaust

may be required to maintain air concentrations below recommended exposure limits.

Gloves Procedures Butyl rubber. Nitrile.

Eye Protection Safety glasses. If potential for splash or mist exists, wear chemical goggles or face shield.

Respiratory Protection Under normal use conditions, respirator is not usually required. Use NIOSH/MSHA approved

disposable dust/mist mask if the recommended exposure limit is exceeded. Consult with an industrial hygienist to determine the appropriate respiratory protection for your specific use of this material. A respiratory protection program compliant with all applicable regulations

must be followed whenever workplace conditions require the use of a respirator.

Clothing Recommendation Gloves, coveralls, apron, boots as necessary to minimize contact. Use chemically protective boots when necessary to avoid contaminating shoes. Do not wear rings, watches or similar apparel that could entrap the material and cause a skin reaction. Launder contaminated

clothing before reuse.

9 Physical and Chemical Properties

Flash Point 260 °C, 500 °F ASTM D 92 (Typical)

Upper Flammable

Limit

Not determined.

Lower Flammable

Limit

Not determined.

Autoignition Point Not determined.

Explosion Data Material does not have explosive properties.

Vapor Pressure Not determined. pH Not determined. Specific Gravity 0.94 (20 °C)

Bulk Density Not determined.

Water Solubility Insoluble.

Percent Solid Not determined.
Percent Volatile Not determined.

Volatile Organic Compound

Not determined.

Vapor Density Not determined. Evaporation Rate Not determined.

Odor Mild

Appearance Clear to yellow liquid.
Viscosity Not determined.
Odor Threshold Not determined.
Boiling Point Not determined.
Pour Point Not determined.

Temperature

Not determined.

Melting / Freezing

Point

Not determined.

The above data are typical values and do not constitute a specification. Vapor pressure data are calculated unless otherwise noted.

Page | 3 MSDS #115468

10 Stability and Reactivity	
-----------------------------	--

Stability Material is normally stable at moderately elevated temperatures and pressures.

Decomposition Temperature

Not determined.

Incompatibility Acids. Oxidizing agents. hydrogen peroxide Aniline reacts violently with

hexachloromelamine and trichloromelamine. If mixed in a confined space, will explode or ignite causing potentially toxic fumes of carbon monoxide, nitrogen compounds and

organic acids. Ozone, nitromethane and boron trichloride.

Polymerization

Will not occur.

Thermal Decomposition

Smoke, carbon monoxide, carbon dioxide, aldehydes and other products of incomplete combustion. Under combustion conditions, oxides of the following elements will be formed:

Thermal decomposition may produce toxic organic vapors/fumes.

Conditions to Avoid Not determined.

11	Toxicological Information
----	---------------------------

-- ACUTE EXPOSURE --

Eye Irritation Severe eye irritant. Risk of irreversible damage to eyes. Based on data from similar materials. Skin Irritation May cause mild skin irritation. Does not meet Canadian D2B or EU R38 criteria. Based on

data from similar materials. Prolonged or repeated contact may cause dermatitis.

Respiratory Irritation
Dermal Toxicity

May cause nose, throat, and lung irritation. Based on data from similar materials.

The LD50 in rabbits is 1000 – 2000 mg/Kg. Based on data from components or similar

materials. Skin absorption of components of this material will cause systemic effects; note

toxicity in other sections.

Inhalation Toxicity The LC50 (1 hr.) in rats for vapors of this material is 20 - 200 mg/l. Based on data from

components or similar materials. High concentrations may cause headaches, dizziness, fatigue, nausea, vomiting, drowsiness, stupor, other central nervous system effects leading

to visual impairment, respiratory failure, unconsciousness and death.

Oral Toxicity The LD50 in rats is 500 – 2000 mg/Kg. Based on data from components or similar materials.

Ingestion of this material can result in neurotoxicity. Signs and symptoms include increased sweating of hands and feet, numbness, tingling and weakness in extremities, unsteady gait

and decreased reflexes.

Dermal Sensitization

May cause skin sensitization. Based on data from similar materials.

Inhalation Sensitization

No data available to indicate product or components may be respiratory sensitizers.

-- CHRONIC EXPOSURE --

Chronic Toxicity

Repeated occupational exposure to tricresyl phosphate over a prolonged period of time may cause delayed neurotoxicity characterized by ataxia and tremors. Overexposure to a

component of this material may result in methemoglobinemia. Symptoms of

methemoglobinemia include weakness and reduction in respiratory rate. Coma and gradual respiratory failure may occur in extreme cases. Cyanosis may occur. Daily administration in the diet of rats produced some toxic effects at levels as low as 1500 ppm. In dogs, no discernable toxic effects at 1500 ppm were reported. High levels of this material in the diet caused degenerative changes in the liver, kidney, adrenal medulla, and thyroid of rats and a

decrease in blood prothrombin content in rats and dogs.

Carcinogenicity Aniline caused tumors of the spleen in test animals. Bladder cancers have been reported in

occupationally exposed groups but co-exposures with other chemicals limits conclusions.

Mutagenicity Aniline was mutagenic in a mammalian cell culture test system and in studies with mammals.

Reproductive Toxicity No data available to indicate either product or components present at greater than 0.1%

that may cause reproductive toxicity.

Quincy Compressor 701 N. Dobson Ave Bay Minette, AL 36507 1-217-222-7700

Page | 4 MSDS #115468

Teratogenicity No data available to indicate product or any components contained at greater than 0.1%

may cause birth defects. Refer

-- ADDITIONAL INFORMATION --

Other No other health hazards known.

12 **Ecological Information**

-- ENVIRONMENTAL TOXICITY --

Freshwater Fish The acute LC50 is 10 - 100 mg/L based on component data. Chronic effects expected at 10 -

Toxicity 100 mg/L based on component data.

Freshwater The acute EC50 is 1 - 10 mg/L based on component data. Chronic effects expected at < 1

Invertebrates Toxicity mg/L based on component data.

Algal Inhibition Not determined. Saltwater Fish Toxicity Not determined. Saltwater Not determined.

Invertebrates Toxicity

Bacteria Toxicity The acute EC50 is 10 - 100 ppm based on component data.

Miscellaneous Toxicity Not determined.

-- ENVIRONMENTAL FATE --

Biodegradation Adequate data is not available to estimate the biodegradation potential of this material. Bioaccumulation Less than 1.0% of the components potentially bioconcentrate, based on octanol/water

coefficients.

Not determined. Soil Mobility

13 Disposal Considerations

Waste Disposal This material, if discarded, is not a hazardous waste under RCRA Regulation 40 CFR 261.

Treatment, storage, transportation, and disposal must be in accordance with applicable

Federal, State/Provincial, and Local regulations.

14 Transport Information

ICAO/IATA I Not regulated. ICAO/IATA II Not regulated. **IMDG** Not regulated. **IMDG EMS Fire** Not applicable. IMDG EMS Spill Not applicable. IMDG MFAG Not applicable. Not determined. MARPOL Annex II **USCG** Compatibility Not determined.

Review classification requirements before shipping materials at elevated temperatures.

15 Regulatory Information

-- Global Chemical Inventories --

USA All components of this material are on the US TSCA Inventory or are exempt.

Other TSCA Reg. None known.

EU All components comply with the EU 7th Amendment and are approved for EU sales. Lubrizol

must maintain records of all imports of this product into the EU. Third party importers are asked to report every import to The Lubrizol PSCD Manager (Europe), Hazelwood, Derby

DE56 1QN, UK.

Japan May require notification in Japan.

Australia All components are in compliance with chemical notification requirements in Australia.

New Zealand All components are in compliance with chemical notification requirements in New Zealand.

Canada All components are in compliance with the Canadian Environmental Protection Act and are

present on the Domestic Substances List.

Switzerland All components are in compliance with the Environmentally Hazardous Substance Ordinance

in Switzerland. Lubrizol must maintain records of all imports of this product into Switzerland. Third party importers are asked to report every import to The Lubrizol PSCD Manager

(Europe), Hazelwood, Derby DE56 1QN, UK.

Korea All components are in compliance in Korea.

Philippines All components are in compliance with the Philippines Toxic Substances and Hazardous and

Nuclear Wastes Control Act of 1990 (R.A. 6969).

China All components of this product are listed on the Inventory of Existing Chemical Substances

in China.

Taiwan May require notification before sale in Taiwan.
